

Introduction to Carbon Markets & Carbon Credit Project Development

This training introduces participants to the fundamentals of carbon markets, carbon credits and carbon project development. Participants will gain an understanding of the differences between compliance and voluntary carbon markets, the Malaysian carbon market landscape, relevant carbon credit standards, and the carbon credit project development process.

The training combines instructor-led classroom learning, practical examples, case studies, guided discussions and a group exercise. It is designed to help organisations identify potential carbon project opportunities and understand key considerations before developing or participating in carbon credit projects.

Objective

- Understand the fundamental concepts of carbon markets and carbon credits.
- Understand the Malaysian and international carbon market landscape.
- Understand carbon credit standards and the project development process.
- Identify potential carbon project opportunities and key project risks

Learning Outcomes

- Explain key carbon market concepts, terminology and compliance.
- Describe the Malaysian carbon market landscape and relevant international frameworks.
- Outline the key stages, standards and requirements in developing a carbon credit project.
- Conduct an initial screening of potential carbon project opportunities.
- Recognise key risks and due diligence considerations.
